The dataset provided to you consists of a list of all the TV shows/movies available on Netflix:

Show_id: Unique ID for every Movie / Tv Show
Type: Identifier - A Movie or TV Show
Title: Title of the Movie / Tv Show
Director: Director of the Movie
Cast: Actors involved in the movie/show
Country: Country where the movie/show was produced
Date_added: Date it was added on Netflix
Release_year: Actual Release year of the movie/show
Rating: TV Rating of the movie/show
Duration: Total Duration - in minutes or number of seasons
Listed_in: Genre
Description: The summary description

Hints

1. The exploration should have a goal. As you explore the data, keep in mind that you want to answer which type of shows to produce and how to grow the business.
2. Ensure each recommendation is backed by data. The company is looking for data-driven insights, not personal opinions or anecdotes.
3. Assume that you are presenting your findings to business executives who have only a basic understanding of data science. Avoid unnecessary technical jargon.
4. Start by exploring a few questions: What type of content is available in different countries?
    1. How has the number of movies released per year changed over the last 20-30 years?
    2. Comparison of tv shows vs. movies.
    3. What is the best time to launch a TV show?
    4. Analysis of actors/directors of different types of shows/movies.

Evaluation Criteria :

1. Defining Problem Statement and Analysing basic metrics
2. Observations on the shape of data, data types of all the attributes, conversion of categorical attributes to 'category' (If required), missing value detection, statistical summary
3. Non-Graphical Analysis: Value counts and unique attributes

4. Visual Analysis - Univariate & Bivariate
    - For continuous variable(s): Distplot, countplot, histogram for univariate analysis
    - For categorical variable(s): Boxplot
    - For correlation: Heatmaps, Pairplots
5. Missing Value & Outlier Treatment (optional)
6. Insights based on Non-Graphical and Visual Analysis
    1. Comments on the range of attributes
    2. Comments on the distribution of the variables and relationship between them
    3. Comments for each univariate and bivariate plot
7. Business Insights - Should include patterns observed in the data along with what you can infer from it
8. Recommendations - Actionable items for business. No technical jargon. No complications. Simple action items that everyone can understand
